

There are 100's of millions of microwave ovens in use in the US. There are millions more that have been scrapped because the control board went bad, but the killer components inside still work fine. Anybody can buy a used microwave for \$35 to \$100... no questions asked.

Live flesh, exposed to a powerful microwave beam, can heat up and explode!

In 1953, Russia bombarded the American Embassy in Moscow with microwaves in retaliation for the US refusing to head off an arms race in RF/EMF weapons. Ambassador Walter Stoessel contracted a blood disease, bleeding eyes, severe nausea and eventually lymphoma. He, and other employees, eventually died as a result of these microwave attacks. The US government chose to keep the attacks secret, did not evacuate the embassy and did not even inform the embassy employees. Instead, Henry Kissinger sent a secret memo, giving hazardous pay to embassy employees. From 1953 until some time in the 1970s, the US government used the embassy employees as microwave guinea pigs. Many employees contracted various diseases, including cancers, and died as a direct result. To learn more about the effects of microwaves on living creatures, DARPA set up a laboratory at Walter Reed Army Institute of Research and participated in Project Pandora where they bombarded monkeys (trapped inside of cylinders so they couldn't escape - the videos will enrage you) with microwaves. Similar studies were conducted on **American Veterans** at the VA Hospital in Kansas City. Those same studies continued at the University of Rochester, Brooks Air Force Base, Johns Hopkins, MIT, The Mitre Corporation, the University of Pennsylvania and other foreign and domestic labs.

Bottom line: You cannot trust any government to ever... **EVER**... tell you the truth. The millions of cases where they have lied to us to cover their own incompetence, heartlessness/sick/twisted experimentations on us... are overwhelming evidence we mean nothing to them. And, they kept secret the eminent dangers of RF/EMF weapons (in use by governments and law enforcement agencies around the world). Once again, we have been 'thrown to the wolves' and left on our own to discover the truth and find some way to defend ourselves from these horrible new weapons they have created.

NxDef has discovered at least part of the truth. And we have engineered a defense against these new RF/EMF weapons, whether used against us by terrorists, or by our own government.

DISEASES AND CONDITIONS CAUSED BY RF/EMF

- Confusion
- Short Term Memory Loss
- Inability to focus
- Brain fog/sluggish thinking
- Difficulty concentrating
- Headaches
- Migraines
- Vision disruption or other eye problems
- Eye pain
- Cataracts
- Head or chest pressure
- Allergies
- Difficulty breathing
- Respiratory problems
- Slow reaction time
- Sleep disruption
- Insomnia
- Night sweats
- Nightmares
- Dizziness
- Disorientation
- Balance problems
- Agitation
- Anxiety
- Depression
- Suicide
- Tension/Hypertension
- Irritability
- Tremors
- Nervousness
- Seizures
- Vertigo
- Nausea or vomiting
- Flu-like symptoms
- Digestive difficulty
- Nose bleeds
- Hair loss
- Rapid aging/oxidative damage
- Skin problems and rashes
- Skin irritation/dryness
- White noise 24/7
- Ringing/buzzing in ears
- Ear pain
- Tinnitus
- Bed wetting
- Urinary problems
- Behavioural problems in children
- Pets get jumpy
- Mood disorders
- Lethargy
- Exhaustion
- Chronic fatigue
- Lost productivity/sick days
- Loss of employment
- Unusual family conflicts
- Disintegrating relationships
- Violent behaviour
- Autism
- ADHD
- Weakened immune system
- Physical weakness or pain
- High blood pressure
- Leg cramps
- Mercury dental fillings vapor leak causing organ and brain damage
- Psoriasis
- Autoimmune disease
- Lupus
- Damage to mitochondria
- Free radical damage/aging
- Worsening already poor health
- Demineralization of cells and tissues
- Impotence
- Infertility
- Birth defects
- Life span decrease of +/- 8 years
- Heart attack
- Pacemaker defibrillation
- Circulation problems
- Joint difficulty
- Muscle pain
- Fibromyalgia
- Dementia
- Personality changes
- Alzheimer's, Parkinson's, ALS (Amyotrophic Lateral Sclerosis)
- Childhood cancers increase
- Brain tumors
- Rare, deadly brain glioma
- Leukemia
- Cancer
- Diabetes
- Heating of tissues that feels like a fever (for no reason)
- Rhinitis (inflammation of nasal membranes)
- Asthma
- Allergies such as hayfever
- New food allergies
- Atopic dermatitis (inflammation of the skin)
- Itching and chapped skin on the body trunk
- Rheumatism (painful condition of joints and muscles - stiffness)
- Benign uterine fibroid tumors
- Bone loss/osteoporosis
- Dehydration
- Kidney damage
